C-ROSS Compliance Guide

1. Overview

This document defines technical compliance requirements under China Risk-Oriented Solvency System (C-ROSS Phase II), covering solvency data collection, calculation, reporting, and system integration. It is intended for developers and operators of the data platform, core systems, and actuarial systems.

2. C-ROSS Framework

2.1 Three Pillars

Pillar	Content	Tech Impact
Pillar 1 Quantitative	Capital requirements, actual/minimum capital	Actuarial models, data platform
Pillar 2 Qualitative	Risk management, SARMRA	Risk management systems, controls
Pillar 3 Market Discipline	Information disclosure	Reporting systems, data publishing

2.2 Key Metrics

Metric	Definition	Requirement
Comprehensive Solvency Ratio	Actual Capital / Minimum Capital	$\geq 100\%$
Core Solvency Ratio	Core Capital / Minimum Capital	$\geq 50\%$
Comprehensive Risk Rating	Integrated risk assessment	A/B/C/D grades

3. Technical System Requirements

3.1 Data Collection & Validation

Source	Data	Frequency	Quality
Underwriting	Policy details, premium	T+1	100% accuracy, $\geq 99.9\%$ completeness
Claims	Paid/pending claims	T+1	100% accuracy
Finance	Assets, liabilities, P&L	T+1	Matches general ledger
Actuarial	Reserve assessment	Monthly	Actuarial report validation
Investment	Asset allocation, returns	T+1	Custodian bank reconciliation

3.2 Data Quality Requirements

Dimension	Requirement	Monitoring
Completeness	Key field non-null $\geq 99.9\%$	Data quality platform
Accuracy	100% match with source	Cross-validation rules
Timeliness	T+1 10:00 AM completion	Timeliness monitoring
Consistency	Cross-system metric alignment	Consistency checks
Traceability	Back to source documents	Data lineage
Stability	No abnormal fluctuation	Volatility monitoring

4. Reporting

Report	Frequency	Deadline	System
Quarterly Solvency Report	Quarterly	D+30	Regulatory system
Annual Solvency Report	Annual	Apr 30	Regulatory system
Interim Solvency Report	Triggered	D+3	Regulatory system
Risk Rating Report	Quarterly	D+30	Regulatory system
SARMRA Report	Annual	June	Regulatory system

5. System Integration Architecture

Business Systems → Data Platform → Solvency Engine → Validation → Report Generation → Regulatory Submission

6. IT Compliance Checklist

Check	Requirement	Cadence
Source data completeness	No missing key fields	Daily
Reconciliation	Financial vs business = 0 diff	Daily
Report backup	Encrypted archive	Quarterly
Calculation change control	Versioned + approved	Per change
Data access audit	Quarterly review	Quarterly
