# Claims Process Standard

---

## 1. Overview

This document defines the complete claims process and system interaction standards, including FNOL (First Notice of Loss), investigation, case opening, assessment, calculation, approval, settlement, and payment. It is intended for developers and testers of the claims center, payment center, anti-fraud engine, and reinsurance center.

## 2. Business Process

### 2.1 Main Flow

FNOL → Investigation → Case Open → Assessment → Calculation → Approval → Settlement → Payment

### 2.2 Detailed Steps

#### Step 1: FNOL

- Channels: Customer service hotline, App, third-party platforms
- Info collected: Policy number, accident time, accident location, description
- Validation: Policy validity, accident within coverage period
- Generate case number, status: Reported

#### Step 2: Investigation

- Self-service (small claims): OCR + automated assessment
- Complex cases: Assign investigator for field investigation
- Investigation conclusion: Nature of accident, scope of damage
- Upload documentation to image management system

#### Step 3: Case Opening

- Determine insurance liability
- Verify: Timely reporting, within coverage scope
- Case opened → proceed to assessment

#### Step 4: Assessment

- Determine extent of damage and compensation scope
- Reference repair quotes / medical expense lists
- Initiate advance payment if eligible

#### Step 5: Calculation

- Calculate compensation amount based on policy terms and assessment
- Apply deductible
- Check proportional sharing (co-insurance/reinsurance)

#### Step 6: Approval

- Auto-approval (small/simple claims)
- Manual approval (large/complex claims)
- Decision: Approved / Rejected / Adjusted

#### Step 7: Settlement & Payment

- Settlement confirmed
- Notify payment center to disburse
- Notify reinsurance center if exceeds retention

## 2.3 Claim Triage

| Type       | Amount            | Process                | SLA |
|------------|-------------------|------------------------|-----|
| Fast Track | ≤ 3,000 CNY       | Fully automated        | T+0 |
| Standard   | 3,000-10,000 CNY  | Auto + manual review   | T+1 |
| Complex    | > 10,000 CNY      | Full manual            | T+3 |
| Dispute    | Unclear liability | Manual + legal support | T+7 |

## 3. Anti-Fraud Rules

| Rule               | Description                                  | Severity |
|--------------------|----------------------------------------------|----------|
| Waiting Period     | Claims shortly after policy effective date   | High     |
| High Frequency     | Multiple claims in short period              | High     |
| Blacklist Matching | Customer/hospital/garage on blacklist        | High     |
| Amount Anomaly     | Unusually high claim amount                  | Medium   |
| Duplicate Claim    | Same accident multiple claims                | High     |
| Time Anomaly       | Excessive gap between accident and reporting | Medium   |

## 4. System Interaction

| Interface            | Caller  | Responder         | Description            |
|----------------------|---------|-------------------|------------------------|
| Report Claim         | Channel | Claims            | Create claim record    |
| Policy Query         | Claims  | Policy            | Validate policy status |
| Fraud Check          | Claims  | Risk Engine       | Fraud risk scoring     |
| Damage Assessment    | Claims  | Assessment System | Auto/manual assessment |
| Approval Request     | Claims  | Approval Engine   | Auto/manual approval   |
| Payment Request      | Claims  | Payment           | Disburse claim         |
| Reinsurance Recovery | Claims  | Reinsurance       | Ceded share recovery   |

## 5. Exception Scenarios

| Scenario      | Action                        |
|---------------|-------------------------------|
| Policy lapsed | Reject claim with explanation |

| Scenario              | Action                          |
|-----------------------|---------------------------------|
| Out of coverage scope | Issue rejection notice          |
| Third-party liability | Pay first, subrogation recovery |
| Duplicate report      | Merge claims for same accident  |
| Assessment dispute    | Third-party evaluation■■■       |
