Product Configuration & Management Standard

1. Overview

This document defines insurance product configuration and management standards, covering product definition, rate management, clause management, and product launch/sunset approval. It is intended for product center developers/testers and the actuarial team.

2. Product Data Structure

2.1 Core Product Model

```

3. Product Launch Process

Phase	Owner	Output	Duration
Actuarial Design	Actuarial	Pricing report, rate table	T+30
Product Configuration	Product Center	Configured product	T+5
Testing	QA	Test report	T+10
Regulatory Filing	Product	Filing materials	T+30
UAT	Product/Actuarial/Compliance	Sign-off	T+3
Launch	Ops/Dev	Product available	T+1

4. Product Version Management

- Products are immutable after creation; updates via new versions
- Versioning: MAJOR.MINOR.PATCH
- MAJOR: Rate/clause changes
- MINOR: Rule/commission adjustments
- PATCH: Text/description fixes
- Historical versions read-only, never deleted
- Only one active version per product at any time

5. Rate Management

5.1 Rate Table Structure

```
{
  "rateTableId": "RT-PRODUCT-2024-01",
  "productCode": "PROD-001",
  "rateType": "LEVEL",
  "factors": ["entryAge", "gender", "paymentPeriod"],
  "rates": [
    {"entryAge": 25, "gender": "M", "paymentPeriod": 20, "ratePerThousand": 12.5}
  ]
}
```

5.2 Rate Change Management

- Rate changes require actuarial approval and change rationale
- Parallel old/new rates require effective date boundary
- Existing policies unaffected by rate changes

6. Product Launch/Sunset

Action	Trigger	Approval	Impact
Launch	New product	Product→Actuarial→Compliance→Tech	All channels can sell
Sunset	Product disc ontinuation	Product→Actuarial→Compliance→Channel	Stop new applications
Suspend	Temporary adjustment	Product	Stop new, pending apps continue
Resume	After suspension	Product	Resume sales
